

Lumen Pay: Saved Cards Brief (synthetic)

Most shoppers abandon checkout at the card entry form. Support tickets about failed card entry doubled between March and June.

Shoppers need to pay without retyping their card number on every purchase.

As a returning shopper, I want to save my card so that I can check out in one tap.

Card data must be stored and processed in line with PCI DSS version 4.0. Settlement files must be delivered to Acme Bank by 06:00 UTC under the signed Master Services Agreement.

Delivery depends on the Fraud team shipping the new risk-scoring API.

The review is on Thursday at 3pm in the blue room.
